

# HV-DISTRIBUTOR

Distributors for TRUE ION ionisation systems

## Key Facts

- ✓ **Optimum multi-use:** Perfectly suited for the simultaneous connection of several ionisers
- ✓ **Easy installation:** Simplified routing and installation of unloading components
- ✓ **Cable management:** Reduced cabling for more efficient routing
- ✓ **Robust design** for high reliability and durability

# Product Description

The distribution box with 4 HV outputs enables the easy and efficient distribution of HV signals. Quick and easy installation is guaranteed thanks to a plug connection, no tools required. Please note the maximum connection length of the adaptors to ensure optimum functionality.
